

GREEN UTILITIES S C H E M E

www.energycentric.co.uk

Having successfully worked with the HTA for the last few years we are ideally placed to be able to help the HTA and their members achieve their sustainability goals.

We believe it is imperative that everyone starts to take more responsibility for their environmental impact and to take steps towards reducing their carbon footprint. We all want to live and work in a more environmentally friendly and sustainable way, so with that in mind we have developed a greener Utilities Scheme focused on two key areas – Energy and Water and we have done all the work for you so you can focus on what you do best

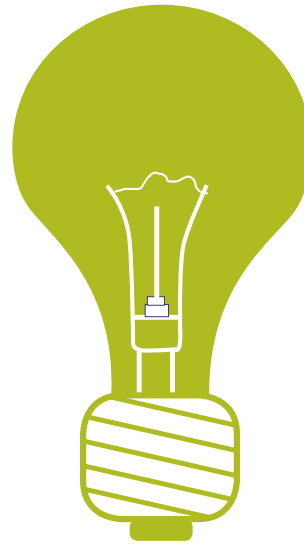

This new scheme will help you be more energy efficient and members will enjoy many new benefits. We have launched The Green Utilities scheme in line with the HTA Board and their key values and goals.

With HTA board support, this has seen us partnering with Good Energy for **Electricity** and Gas supply and Waterplus for **water** supply. We have chosen both of these partners due to their impeccable green credentials and their appetite to work with the HTA membership. Whilst offering members excellent value and superb customer service, both partners will be providing additional services to ensure that as an HTA member, you receive help with your specific energy and water challenges, Furthermore, they are offering better value via our Green Scheme than can be achieved directly.

THE PARTNERS

Good Energy

Founded in 1999, Good Energy was the first electricity supplier in the UK to offer 100% renewable tariffs. All its electricity is sustainably sourced from its growing community of over 1400 independent generators across the UK as well as from its own fleet of 6 solar parks and 2 wind farms. Good Energy's gas is also carbon neutral with 6% of its gas supply coming from UK sourced biomethane with the rest being carbon offset.

Good Energy is trusted by over 5000 UK businesses to supply them with sustainably sourced energy, including some of the UK's most ethical brands - Eden project, Innocent drinks, Pukka Herbs, Neal's Yard, Blenheim Palace, Brecon Beacons national park and The Soil Association. Here are some of the benefits you would receive as an HTA member by switching to Good Energy

These are some of the benefits being offered by our scheme: -

1. Preferential prices (fixed and standard variable tariffs).
2. 12 or 24 month fixed term contracts available.
3. 100% renewable electricity sustainably sourced from Good Energy's community of 1400 independent UK generators and carbon neutral gas
4. Payment terms of up to 28 days as standard and more than 28 days on request.
5. Energy survey and sustainability advice service
6. EV charging infrastructure options
7. Onsite generation and battery storage advice
8. Award winning customer care by UK experts based in Wiltshire
9. Certificates and support to help you promote your commitment to sustainability
10. Discount scheme for your staff and customers

Water Plus

When it comes to your water supplies, the key to being environmentally friendly is to focus on water efficiency. That's where Water Plus are experts. Water Plus are the largest water retailer in the UK, supplying one in three of all business water in England. They are a joint venture between United Utilities and Severn Trent, two companies who have been in the water market for years.

Water Plus have a blend of water industry, customer service and utility retail experience. Their in-depth water industry knowledge sets them apart because they can deliver more than just retail services. Water Plus can help members to have a better understanding of how they are using water, and so how to become more efficient and save money.

These are some of the benefits being offered by our scheme: -

1. Free water efficiency desktop survey, including a full review of return to sewer allowances for HTA members. This is likely to mean significant cost savings.
2. Where members have high consumption patterns, or unusual consumption data, they will recommend water efficiency solutions to reduce water consumption and therefore costs.
3. Access to an online shop with water saving devices and equipment.
4. Billing services, water management information, service support and water efficiency advice.
5. Water meter resizing to reduce costs.
6. Leak detection and repair services, to target leaks and water wastage on a reactive and proactive basis.
7. Installation of AMR meters where required to monitor and reduce water use.
8. Benchmarking against similar size and type of businesses to improve efficiency.

We have tried to keep the process of participating in our scheme as simple as possible: email to us at htasustain@energycentric.co.uk or call us at **01708 765555** letting us know you are an HTA member will start the ball rolling.
